# From The Directors Desk

- **Mr Arpit Mishra is one of director as well as CEO of VEPL.Mr Mishra has Done B.Tech In Electronics Engg From U.P.T.U.in 2012.During his college days he joined ART of Excellence (an organization which fills the gap between corporate and Professionals) as a Motivational Speaker. After Completing B.Tech Mr.Mishra Joined American Express (AMEX) as a Process Developer.**
- **In Later Stages of Professional Career mr Mishra joined investment and credit rating agency of india (ICRA) and HDFC Bank in middle management and senior management positions respectively.Due To Diversified Exporeure and versatile attitude Mr Mishra was able to comprehend with the changing dynamics of economics and technology.mr Mishra is a fast technocrat and accurate decision maker.**
- **He worked as an advisor or consultant to various corporates in city gas distribution (CGD) industry.he also worked as a consultant in various projects of GAIL,BPCL,JIO BP,Indraprastha gas limited (igl). in the list of his achievements he was the one who made the detailed feasibility report of Punjab and assessed the demand of gas network in various areas of Punjab.**
- **Mr Mishra has expertise in establishment of CNG Station,Contract management,lng establishment,laying of steel pipeline and mdp pilpeline.he also wide knowledge of project planning,project execution,material procurement and what not.**
- **His fast forwarding nature,unflinching attitude,focussed energy had blessed vepl with stable footprints and exponential growth.**

# Why **Vagmi Energy** ?

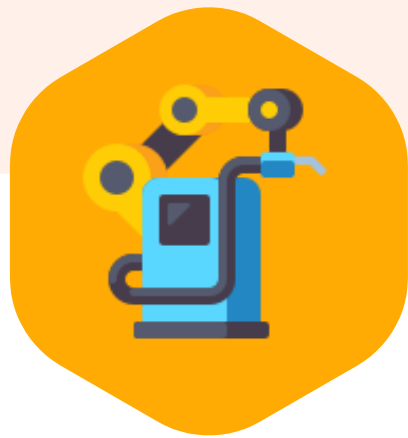

# Our Team

- **Experts from all verticals of oil and gas industry**
- **Key personnel from various industries as our Domain Consultants (City Gas, CNG stations, oil,export ,Public Utilities,real estate and many more.**
- **Pool of talent with exceptional education and professional background**
- **Experience with both Indian and global companies**
- **Strong understanding of Indian business environment including working with various Government agencies at different levels .**

# Vagmi Energy Offerings Services

## Petrol Pump Establishment

Establishing a petrol pump involves several critical steps, including obtaining necessary licenses, selecting a strategic location, ensuring safety and compliance with regulations, and securing funding.

## CNG Station Establishment

Establishing a CNG (Compressed Natural Gas) station involves several key steps to ensure compliance, safety, and efficient operations. Ensure the design meets safety standards and accessibility requirements.

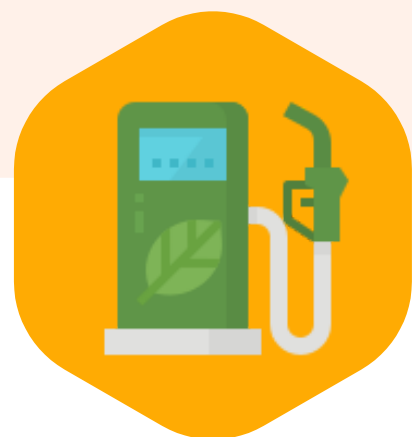

## Compressed Bio Gas Plant (CBG) Plant

Establishing a Compressed Bio Gas (CBG) plant involves a series of detailed steps that cover regulatory compliance, site selection, infrastructure development, and operational management.

# Vagmi Energy Offerings Services

## Ethanol Plant Production

Establishing an ethanol production plant involves several detailed steps, including regulatory compliance, site selection, technology implementation, and operational management.

## Portable Petrol Pump Establishment

Establishing a portable petrol pump involves specific steps to ensure regulatory compliance, safety, and operational efficiency. Assess competition and potential profitability.

## LNG Transportation

Transporting Liquefied Natural Gas (LNG) requires careful planning and adherence to safety, environmental, and regulatory standards due to the hazardous nature of the material.

# Petrol Pump Establishment

- **End To End Consultancy For establishment of Petrol Pump.**
- **Permissions/Approvals from state authorities as well as from Central authorities.**
- **Engg and Design.**
- **Feasibility assessment.**
- **Construction as Per Designed Standards.**
- **Selection of Land/Provision of land in long term lease basis/Purchase basis.**
- **Due Diligence activities such as assessment of land w.r.t guidelines.**

# CNG Station Establishment

- Procurement of Machinery./Equipment's.
- Construction and Tap off as per Design Standards.
- Permissions/Approvals From state authorities/Central Authorities.
- Making of Detailed Feasibility Report.
- Provision of land across india on long term lease basis.
- Engg and Design.
- Gas Supply from City Gas Distribution Company (CGD)

# Compressed Bio Gas Plant (CBG)

- We facilitate Raw material Production which will be used as primary input in a CBG Plant.
- Procurement of machinery
- Complete Construction of Bio Gas Plant.
- Facilitating MOU from Oil Marketing Companies (OMC) and City Gas Distribution Company (CGD).
- Making Of Detailed Feasibility Report.
- Project Funding Through govt banks/NBFC's.
- We also Provide Two years Free maintenance Services.
- Facilitating Gas Sale agreement (GSA) with Oil Marketing Companies and CGD Entities.

# Ethanol Production Plant

- We can Facilitate End To End Consultancy For Establishment of Ethanol Production Unit (ETU).
- Source high-quality equipment for feedstock processing, fermentation, distillation, and dehydration.
- We can Provide the Best source of raw material for both grades of ethanol (A&B).
- We can facilitate subsidy from govt in interest Subvention Scheme.
- Due Diligence activities such as Permissions/Approvals, Making of Detailed Feasibility Report are Part and Parcel of

# Portable Petrol Pump

- **Portable Petrol Pump is Indo-Czech (European) Technological solution Originally Manufactured by Czech Based Company called Petrocard. Cz and Exclusively marketed by VEPL in India and other parts of Asia.**
- **Portable Petrol Pumps are fully automated, can be used with or without Manpower.**
- **Portable Petrol Pumps can be used with any debit card, credit card or any electronic wallet like Paytm, Phone Pay, Google Pay or any other Mobile app.**
- **Whole operation of Portable Petrol Pump can be remotely controlled with Surveillance System, Cameras and other applications.**

# LNG Transportation

- **Transporting LNG for small-scale consumers is possible via road, rail, or waterways. Road-based transport is common, with trucks hauling LNG containers (20–40 ft long, approximately 16-34 tonnes gross weight, approximately 20-48 kilolitres capacity) from the LNG terminal to the satellite plant.**
- **Rail-based transport of LNG using cryogenic tank wagons can help improve efficiency, provided the rail network can connect the LNG terminal and the demand node. Similarly, LNG can be transported by small LNG tanker ships.**
- **The extended range that LNG offers also minimises the need for fuel stops.**
- **The LNG can also be used as fuel for the prime mover (especially for road and waterways). LNG use instead of diesel in trucks can improve engine efficiency by approximately 15 per cent . LNG purchased from the importing terminal also costs significantly less than diesel available at fuel stations.**

# Strength

We had full fledged team of experts who are retired professionals of various govt organizaions such as GAIL,IGL etc

vWe connect various dots for conducting EPMC such as Project Funding,Subsidy,Grant etc

We are knowledge based tech driven company and work on realistic calculations.

We are Committed to complete the Project in Tight guidelines as well in Projected time.

# Weakness

**We built Relationship with our clients and treat them as a part of VEPL Family which sometimes hinders our Professional environment.**

**More Focussing on quality Standards sometimes reduces our margins.**

**Energy Sector is the backbone of Socio  
Economic growth of our nation.**

**Alternative fuel and green energy has  
become the demand of the entire world.**

## **Opportunities**

**We provide one stop solution for sustainable business in energy sector which can help Private Players as well as companies not only help to grew their business in energy sector but also help nation to find a way solution in the field of alternative fuel and energy sector.**

# Threat

**The demand will always be high then the supply in global scenario.**

**The field of alternative fuels/Green Energy is the most lucrative field in current scenario hence there are no threats.**

**Understand the high global demand and potential markets for LNG.**
